A CORDIAL WELCOME AWAITS YOU

MAY 17, 2009

“Just You”

There used to be a saying that was fairly popular years ago. It went like this: “Ya’ know what this world needs? I’ll tell ya’ what this world needs. This world needs ...” and then whatever the person thought the world needed would proceed to tell his listeners. Well, let me tell you. You know what this world needs?

This world needs people who cannot be bought; whose word is their bond; who put character above wealth; who are larger than their vocations; who do not hesitate to risk rejection; who will not lose their identity in a crowd; who will be honest in small things as in great things; who will make no compromise with wrong; whose ambitions are not confined to their own selfish desires, who will not do something because everybody else is doing it; who are true to their friends through good report and evil report; in adversity as well as prosperity; who do not believe that shrewdness and cunning are the best qualities for winning success; who are not ashamed to stand for truth when it’s unpopular; who can say “no” with emphasis although the rest of the world says “yes.”

The world doesn’t need every person in the congregation at Warner’s Chapel to be this way – just you.

— Frank

It was reported last Lord's Day that **Wayne Hutchins** was having asthma related breathing difficulties. He is improving some at this time.

Sherrill Stewart's friend, Madeline Holbrook's niece, **Betty Norman**, is in the Duke Hospital where she has had her stomach removed. It is believed that the problem that required the removal is due to a genetic disorder.

Bees Outsmart Scientists

Scientists have long recognized that bees are intelligent creatures. Many believe that this intelligence is the product of millions of years of natural selection. But the extremely fast learning ability of the bee puts in doubt the millions of years and instead shows the hand of the Creator.

Researchers at Princeton University decided to find out whether bees were smart enough to find their food source if it was moved. The researchers moved the prime food source fifty meters farther from the hive. It took the bees less than one minute to locate the moved food source. The men then moved the food another fifty meters away. The bees still took less than a minute to find the food source. Two more moves, each a precise fifty meters, produced the same results.

However, the bees had also been studying the researchers. Before the researchers could move the food another fifty meters, they found the bees had discovered the pattern and were already waiting at the new location!

God is our Creator and has clearly left evidence of his handiwork—His fingerprints—in the creation itself. For those who have eyes to see, this fills us with wonder, and yes, with love for the Creator God who first loved us.

"And God said, Let the earth bring forth the...creeping thing and beast of the earth after his kind: and it was so." Gen. 1:24
